So how does [booking.com](#) know I am traveling to Vienna from London before heading to Salzburg for [#hic17](#) including all dates? I only entered the dates for Salzburg and London, but never mentioned Vienna. INTERESTING!

Do you have the microphone in you mobile open (approved) for any applications? For example Facebook, why do they need it for? What do they do with the data?

Nope, no microphone open. I came from our events page to [booking.com](#) where all our events are listed. But I doubt they would scrap that as well. any idea how you guys do this? ;-) I am just curious...
